

Overview

This standard is about preparing and applying spray or thin coating sealant within existing chimney **services and systems**, cleaning and maintaining spray equipment, interpreting information, adopting safe, healthy and environmentally responsible work practices, selecting and using materials, components, tools and equipment, in accordance with the **work area** and the **organisational procedures** which are equal to or exceed the current statutory and legislative **documentation and specifications**

This standard is for people working in the occupational area of Chimney Occupations and can be used by operatives, supervisors and managers

A description of terms in bold font in this National Occupational Standard can be found in the Glossary which should be used as a reference point

	Interpretation of information	
Performance criteria <i>You must be able to:</i>	P1	interpret the information relating to the work and resources to confirm its relevance for the following: <ul style="list-style-type: none"> • documentation and specifications • drawings • schedules • contract information • pre-installation surveys • risk assessments • method statements
	Safe work practices	
	P2	comply with the relevant legislation, official guidance and organisational procedures to carry out your work and maintain safe, healthy and environmentally responsible work practices relating to the following: <ul style="list-style-type: none"> • methods of work • safe use of health and safety control equipment relevant to the task being undertaken and the working environment • safe use of access equipment and working platforms • safe use, storage and handling of materials, tools and equipment • specific risks to health including mental health • specific risks associated with asbestos containing materials • specific risks associated with silica dust, mortars and sealants
	Selection of resources	
	P3	select the required quantity and quality of resources for the methods of work: <ul style="list-style-type: none"> • materials, components and fixings • tools and equipment • access equipment
	Minimise the risk of damage	
	P4	comply with organisational procedures to minimise the risk of damage to the work and surrounding area by: <ul style="list-style-type: none"> • protecting the work and its surrounding area from damage • maintaining a safe, clear and tidy work area • disposing of waste in accordance with current legislation and industry best practice

COSVR55
Apply sealant to chimney structures

	Meet the contract specification	
Performance criteria <i>You must be able to:</i>	P5	comply with the contract information to carry out the work efficiently to the required specification by the following: <ul style="list-style-type: none"> • demonstrating work skills to inspect, remove, measure, ream, scrape, mix, apply and finish • using and maintaining hand and power tools, equipment and ancillary items • applying sealant by spray method or thin coating application method for internal chimney surfaces • dismantling and cleaning spray equipment or thin coating application equipment
	Allocated time	
	P6	complete the work within the estimated, allocated time in accordance with organisational procedures , the programme of work and to meet the needs of other occupations and/or client

P1 Interpretation of information		
Knowledge and understanding <i>You need to know and understand:</i>	K1	why organisational procedures have been developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
	K2	types of information, their source and how they are interpreted in relation to: <ul style="list-style-type: none"> • documentation and specifications • drawings • schedules • contract information • pre-installation surveys • risk assessments • method statements
	K3	the range of relevant digital services, tools and systems, and how they are used
	K4	the importance of organisational procedures to report and resolve problems with the information, and why it is important to follow them
P2 Safe work practices		
	K5	information for current legislation and official guidance and how it is applied
	K6	the types of fire extinguishers and how and when they are used in relation to water, CO ₂ , foam, powder
	K7	how emergencies should be responded to and reported in accordance with organisational authorisation and personal skills in relation to: <ul style="list-style-type: none"> • fires, spillages and injuries • emergencies relating to occupational activities • identification of and reporting of asbestos containing materials
	K8	the organisational security procedures for tools, equipment and personal belongings in relation to: <ul style="list-style-type: none"> • operative • site • workplace • vehicles • company • customer • the general public • other occupations within the workplace

COSVR55

<p>Knowledge and understanding</p> <p><i>You need to know and understand:</i></p>	<p>K9</p>	<p>how to report risks and hazards identified by the following:</p> <ul style="list-style-type: none"> • methods of work • risk assessment • personal assessment • manufacturers' technical information • statutory regulations • official guidance • Control of Substances Hazardous to Health (COSHH)
	<p>K10</p>	<p>the accident reporting procedures and who is responsible for making the report</p>
	<p>K11</p>	<p>why, when and how health and safety control equipment identified by the principles of prevention should be used in relation to:</p> <ul style="list-style-type: none"> • collective protective measures • personal protective equipment (PPE) • respiratory protective equipment (RPE) • local exhaust ventilation (LEV)
	<p>K12</p>	<p>how to comply with environmentally responsible work practices to meet current legislation and official guidance when dealing with potential accidents, health hazards and the environment in relation to working:</p> <ul style="list-style-type: none"> • in the workplace • below ground level • in confined spaces • at height • with tools and equipment • with materials and substances • whilst moving and storing materials by manual handling and mechanical lifting

P3 Selection of resources		
Knowledge and understanding <i>You need to know and understand:</i>	K13	why the characteristics, quality, uses, sustainability, limitations and defects associated with the resources are important and how defects should be rectified
	K14	the organisational procedures to select resources, why they have been developed and how they are used
	K15	how to confirm the resources and materials conform with the specification
	K16	how the resources should be used and how any problems associated with the resources are reported in relation to: <ul style="list-style-type: none"> • sealant components • sands • mortars • cements • ceramics • resins and additives • hand tools, material application equipment and ancillary items
	K17	how to identify the suitability and hazards associated with the resources and methods of work and how they are overcome
	K18	how to calculate quantity, length and wastage
P4 Minimise the risk of damage		
	K19	how to protect work and its surrounding area from damage and the purpose of protection from general workplace activities, other occupations and adverse weather conditions and how to minimise damage to existing building fabric
	K20	why and how the disposal of waste must be carried out safely in accordance with the following: <ul style="list-style-type: none"> • environmental responsibilities • organisational procedures • manufacturers' information • statutory regulations • official guidance
	K21	why it is important to maintain a safe, clear and tidy work area

<p>Knowledge and understanding</p> <p><i>You need to know and understand:</i></p>	P5 Meet the contract specification	
	K22	<p>how the methods of work to meet the specification, are carried out and how problems are identified and reported by the application of knowledge for safe, healthy and environmentally responsible work practices, procedures and skills relating to the method and area of work in relation to the following:</p> <ul style="list-style-type: none"> • how to prepare internal chimney structures • how to load and operate spray equipment • how to operate thin coat application equipment • how to apply sealant material to internal chimney surfaces • how to dismantle, clean and maintain spray equipment or thin coat application equipment • why it is important to maintain the correct flue size • why it is important that the flue terminates in an appropriate position • how to provide access for inspection and maintenance • the relevance of an assessment of significance and how to recognise specific requirements for structures of special interest, traditional construction, hard-to-treat buildings and historical significance • how to work safely with, around and in close proximity to plant and machinery • how to identify and follow the installation requirements • how to use hand and power tools and plant equipment • how to work at height using access equipment and working platforms • how and why operative care and maintenance of hand and power tools and plant equipment is carried out
	K23	<p>the importance of team-work and communication, organisational procedures with respect to site behaviours, and how to report inappropriate site behaviours</p>
	K24	<p>the needs of other occupations associated with applying spray or thin coating sealant within existing chimneys</p>
	P6 Allocated time	
	K25	<p>the programme of work to be carried out including the estimated and allocated time and why deadlines should be kept</p>
	K26	<p>the types of progress charts, timetables and estimated times and the organisational procedures for reporting circumstances which will affect the work programme</p>

<p>Glossary</p>	<p>Organisational procedures Organisational Insurances – public, product and employers liability, professional indemnity Company documents contract for the work, safety management plan, CDM, environmental policy, complaints procedure, information privacy and security policy, management structure</p> <p>Work area The area where the equipment will be installed and all areas affected by the work extending to topographical features and meteorological conditions</p> <p>Services and systems Chimney and flue systems, appliances, ventilation systems and appropriate utilities</p> <p>Documentation and specifications Manufacturers’ instructions for all equipment that forms part of the work architect’s plans and site-specific documentation local building rules and regulations Party Wall legislation Clean Air Act Environment Act Smoke Control Zones Permitted Development Conservation Areas Heritage status Areas of Outstanding Natural Beauty Sites of Special Scientific Interest specific requirements of insurance underwriters Building regulations in England and Wales, particularly ADJ but also ADA, ADB, ADF, ADL and AD7 Building Standards Technical Handbook in Scotland Technical Booklets in Northern Ireland, particularly B, D, E, F1, F2, K and L BSEN’s particularly 8303, 15287, 1856, 16510, 1251, 3376, 4834, 12815, 13229, 13240, 15250</p>
