

## GE06 Statutory nuisance checklist

<b>Company name</b>		<b>Project title</b>	
<b>Location</b>		<b>Contract no.</b>	
<b>Statutory nuisance</b>			
		<b>Yes</b>	<b>No</b>
<b>1.</b> Has the appropriate liaison or communication taken place with local stakeholders who may be affected by nuisance?			
<b>2.</b> Are appropriate dust suppression techniques used to minimise air pollution from timber sawing or planing, stone or block cutting, crushing, and so on?			
<b>3.</b> Is dust on site haul roads and material stockpiles dampened down adequately on dry, windy days?			
<b>4.</b> Are haul roads located away from sensitive areas (such as rivers and ditches)?			
<b>5.</b> Are site vehicle speed limits controlled to reduce dust?			
<b>6.</b> Are public roads regularly cleaned using a road sweeper or vacuum?			
<b>7.</b> Do vehicles that remove granular or dusty materials have sheeted covers?			
<b>8.</b> Are all plant and vehicles in good working order with an up-to-date maintenance or service log?			
<b>9.</b> Are enclosed chutes and covered skips used for lowering dusty demolition or waste materials?			
<b>10.</b> Are cement and concrete being mixed in enclosed areas to prevent dust?			
<b>11.</b> Are dust and emission monitoring arrangements in place and records maintained where there are risks of nuisance or environmental damage to sensitive receptors?			
<b>12.</b> Are material stockpiles or spoil heaps protected and stored away from sensitive areas (such as drains, rivers and ditches)?			
<b>13.</b> Have the works been assessed to identify the noise and vibration impact on local neighbours, wildlife (animals and vegetation) and buildings?			
<b>14.</b> Have the local environmental health officer and neighbours been consulted and forewarned of any out-of-hours or major disruptive activities?			
<b>15.</b> Has a Section 61 notice under the Control of Pollution Act 1974 been applied for?			
<b>16.</b> If a Control of Pollution Act Section 61 consent is in place, are noise levels being recorded to ensure that levels are kept within limits?			
<b>17.</b> If possible, have working methods been reviewed to use equipment that reduces noise and vibration (such as pile jacking and chemical bursting)?			
<b>18.</b> Have working hours been defined to restrict noisy operations to certain times of day?			
<b>19.</b> Is noisy plant kept as far as possible from sensitive receptors?			
<b>20.</b> Are deliveries planned to suit the local area?			
<b>21.</b> Are haul routes well maintained to prevent vehicle noise and vibration?			
<b>22.</b> Where required, are noise screens being used to reduce noise transmission?			
<b>23.</b> Are noise screens and hoarding well maintained with no holes and gaps?			
<b>24.</b> Has lighting been positioned to avoid a nuisance at night and is non-essential lighting switched off at night?			
<b>25.</b> Does the site have a procedure for dealing with complaints and issues?
